ABOUT OUR MONITORING SYSTEM

Designed as a **non-active system**, engaging only when a passenger seats themselves, this upgrade offers complete and **direct feedback** to the driver.

Drivers can easily see the passenger count, and each individuals **compliance** to seatbelt safety, on the supplied integrated monitor.

Durable denim seat covers, designed purposely for each seat and designed right here in Perth.

With purpose designed, weight sensitive pressure sensors embedded in each seat, these are discretely hard wired to the supplied drivers monitor. Seat occupancy and belt compliance are clearly and easily displayed.

Our technicians travel anywhere in Australia, making this upgrade and integration into your fleet an easy and straight forward exercise.

You be catered to by fully qualified and experienced seat belt technicians that undergo continuous on-the-job training and development. This ensures Seatbelt Solutions as the definitive choice for any seatbelt needs.

As Australia's premiere fully licensed seatbelt repairer, we are very proud to offer this as a durable and dependable addition to your fleet.

**AVAILABLE IN BLACK OR
GREY DENIM**
